

Hawkeye · Pharma EQMS

Board & Investor Pack · 24-Month Strategic Plan

Market sizing · Competitive positioning · Product vision · Revenue arc · Milestones

Vertical: Pharma GMP

Horizon: Q1 2026 → Q4 2027

Generated: 2026-04-20

1 · Executive Summary

Executive summary

Hawkeye is an **AI-first, multi-industry EQMS platform** that starts with pharma GMP and extends to medical device, food safety, automotive, aerospace, ISO 9001 and AML verticals from a shared architecture. We compete with MasterControl, Veeva Vault QMS, TrackWise Digital, Qualio, Dot Compliance, and ComplianceQuest on the mid-market pharma + CDMO segment — the segment growing fastest while the incumbents battle over Big Pharma.

\$1.87B PHARMA QMS (2024)	13.0% CAGR THROUGH 2030	\$600M MID-MARKET SAM (2026)	50–100 TARGET ACCOUNTS IN 5 YRS
-------------------------------------	-----------------------------------	--	---

Why Hawkeye wins

AI-FIRST + AUDITOR MARKETPLACE AskHawk RAG spans every EQMS module. RFQ-to-auditor marketplace is structurally unique — no EQMS competitor sells third-party audit capacity. This is a wedge for CDMOs and mid-market buyers without in-house audit teams.	MULTI-VERTICAL FROM DAY ONE Module config already supports PHARMA_GMP, MEDICAL_DEVICE, FOOD_SAFETY, ISO_9001, ORGANIC_FARMING, FOREST_COC, REAL_ESTATE. One platform, many industry packs — instead of one pharma-only silo.
UNDER-SERVED MID-MARKET Veeva + MasterControl aim at Big Pharma (\$1M+ ACV, 12-18 month cycles). Qualio + Dot Compliance hit SMB-to-mid. Hawkeye targets mid-market + CDMOs (\$150K ACV, 6-month cycles) with full-EQMS depth, not CAPA-only toy apps.	IMMUTABLE + VALIDATED BY DESIGN Hash-chained audit trail + content-hash integrity + validated SaaS package are on the 12-month roadmap. We turn validation from a 6-month customer effort to a 4-week accept-as-is delivery.

24-month milestones

END OF 2026 (12 MONTHS) - Annex 11 2026 compliance package live - AI CAPA/Deviation co-pilot (40% cycle reduction) - Medical Device vertical shipped (QMSR-ready) 10–20 pharma + CDMO accounts · \$2M–\$3M ARR	END OF 2027 (24 MONTHS) - Validated SaaS delivered (sales cycle cut 3-6 mo) 5+ industry verticals live (Pharma · Device · Food · Auto · ISO 9001) - SOC 2 + ISO 27001 certified; FedRAMP Moderate in-process 50–100 accounts · \$6M–\$15M ARR
---	--

2 · Market

Market sizing & tailwinds

Pharma QMS software is a USD 1.59B–1.87B market (2024-25) growing ~13% CAGR to USD 3–4B by 2030. Life-sciences QMS (pharma = 57–59%) is USD 3.3–3.9B today, USD 9.5–11.4B by 2030-34. Overall QMS market USD 12.5B → 31.5B by 2034 at 10.8% CAGR.

SEGMENT	2024-25 (USD B)	2030 (USD B)	CAGR	SOURCE
Pharma QMS only	1.59	2.98	13.3%	MarketsandMarkets
Pharma QMS only	1.87	3.85	13.0%	Grand View Research
Life-sciences QMS	3.27	9.47	12.7%	Grand View Research
Life-sciences QMS	3.87	11.40	12.8%	Straits Research
All-vertical QMS	12.52	31.54	10.8%	Fortune Business Insights
All-vertical QMS	12.26	28.82	11.5%	Grand View Research

Geographic distribution

NORTH AMERICA 38.6–42.8% of pharma/life-sciences QMS spend (2024)	EUROPE ~25–28% — driven by EU GMP Annex 11 revision (draft Jul 2025, final mid-2026)	APAC 18–22% today, fastest-growing region (China/India/Singapore biologics capex)
---	--	---

Pharma tailwinds driving EQMS spend

EU GMP ANNEX 11 REVISION Draft July 2025 tripled the chapter from 5→19 pages — prescriptive cybersecurity, AI validation, audit-trail lifecycle. Final mid-2026. Forces every EU-market pharma to re-validate or replace legacy systems. source
DSCSA ENFORCEMENT LIVE May 27 2025 (wholesale) + Nov 27 2025 (large dispensers) ended stabilisation period. Package-level electronic traceability now mandatory in US supply chain. source
FDA AI-QUALITY DRAFT GUIDANCE (JAN 2025) Risk-based credibility framework — AI now formally in scope of validated GxP systems. Pulls AI/LLM requirements into EQMS RFPs. source

CDMO CONSOLIDATION + CAPACITY

CDMO market USD 155.5B (2024) → USD 293.6B (2033) at 7.38% CAGR. Fujifilm's \$3.2B Holly Springs site alone drives multi-client EQMS demand. GLP-1 + ADC + biosimilars accelerate. [source](#)

FDA QMSR EFFECTIVE FEB 2, 2026

Harmonises US medical-device reg with ISO 13485:2016, pulling combination-product pharma into device-QMS standards. [source](#)

Sub-segments ranked by EQMS spend growth

RANK	SEGMENT	WHY THEY'RE BUYING
1	CDMOs	Consolidation + multi-client validation burden forces modernisation
2	Cell & Gene	New modality; greenfield QMS builds; bespoke batch-release
3	Specialty/Biotech	Scale-up pre-commercial GxP mandate triggers first EQMS purchase
4	Medical Device	QMSR Feb 2026 triggers refresh cycle
5	Generics	Margin pressure; higher deviation/CAPA volume
6	Big Pharma	Largest absolute spend but replacement-cycle not greenfield

Disruptive shifts right now

GENERATIVE AI INSIDE QMS

Veeva, MasterControl, AmpleLogic embedding LLMs for deviation summarisation, CAPA drafting, SOP generation. McKinsey-cited data: 30–40% fewer repeat incidents, 40% faster closure. [source](#)

CLOUD DOMINANCE ENTRENCHED

Cloud/web-based = 77% of pharma QMS deployments (2024). On-premises TrackWise installs are the refresh-opportunity base.

PLATFORM CONSOLIDATION

Buyers want single-platform doc + training + CAPA + audit + supplier. Veeva + MasterControl positioned as duopoly in new enterprise RFPs (IntuitionLabs 2026).

DATA RESIDENCY / SOVEREIGNTY

Annex 11 cyber + disaster-recovery reqs + regional cloud rules (EU/China/India) drive regional-hosting architecture.

SALESFORCE-NATIVE RISE

ComplianceQuest + Dot Compliance + TrackWise Digital gain mid-market by leveraging Salesforce ecosystem. Reduces buyer IT burden; adds SF license tax.

Buyer profile (mid-size pharma)

ECONOMIC BUYER

VP/Head of Quality or CQO signs; CIO co-signs for cloud + validation scope; CFO approves >\$750K; COO joins for CDMOs

INFLUENCERS

QA managers · Regulatory Affairs lead · CSV/GAMP 5 validation lead · IT security (Annex 11 cyber)

SALES CYCLE

6–12 months mid-market · 12–18 months enterprise

TYPICAL ACV

\$20K–\$30K entry · \$150K–\$400K mid-market · \$1M+ enterprise all-in

DEAL BLOCKERS

'no budget / other priorities' (>50% stalls); validation effort; ERP/MES/LIMS integration scope; change-management fear

Sources: SGS Systems pricing guide · Simploud cost analysis · Zen QMS true cost

Hawkeye TAM / SAM / SOM

\$3.5–4B

TAM (2030)

**~\$1.1B/yr
(2030)**

SAM (2030)

\$6-15M

SOM ARR 5-YR

50-100

TARGET ACCOUNTS

TAM: \$3.5–4B by 2030 — Pharma QMS \$1.87B (2024) + adjacent biotech/specialty via GVR life-sciences envelope

SAM: ~\$600M/yr (2026), ~\$1.1B/yr (2030) — Mid-market share estimated 30–35% of pharma QMS; 3,000–5,000 mid-market pharma + CDMO accounts globally × \$150K avg ACV

SOM: \$6M–15M ARR in 5 years — 1–2% SAM share achievable for well-funded entrant (Qualio/ComplianceQuest early trajectory). 50–100 accounts × \$150K ACV

Mid-market (100–2000 FTE, \$50M–\$1B revenue, pharma + CDMO). Assumptions stated — verify before investor deck.

3 · Competitors

Competitive landscape — pharma EQMS

11 active competitors span the pricing spectrum from \$12K/yr (Qualio) to \$1M+/yr (Veeva, TrackWise). None has broken out of pharma-only; none has an auditor marketplace; most lack multi-vertical industry packs.

VENDOR	CLOUD-NATIVE	PHARMA FOCUS /5	AI MATURITY /5	EASE OF VALIDATION /5	ANNUAL COST	SWEET-SPOT SIZE
MasterControl	Yes+on-prem	5	4	4	\$50K–\$500K+	Mid-Enterprise
Veeva Vault QMS	SaaS only	5	4	4	\$75K–\$1M+	Mid-Large Pharma/Biotech
TrackWise Digital (Honeywell/Sparta)	Partial	5	4	3	\$100K–\$1M+	Large Pharma
Caliber EQMS	Hybrid	5	2	3	\$25K–\$200K	APAC Pharma, Mid-market
Dot Compliance	SF-native	4	4	4	\$15K–\$150K	SMB–Mid Life Sci
ComplianceQuest	SF-native	4	3	4	\$40K–\$400K	Mid-market Multi-industry
Qualio	SaaS	4	4	5	\$12K–\$120K	Startups–Mid Bio
ETQ Reliance	SaaS+on-prem	3	3	3	\$50K–\$500K	Mid-Large Multi-industry
ValGenesis (VLMS 5.0)	SaaS	5	4	5	\$100K–\$1M+	Large Pharma/Biotech

Competitor profiles

MasterControl

source

Established pharma EQMS leader; LNS Research #1 (2025); ISO 42001 AI-cert.

DEPLOYMENT

SaaS multi-tenant + FedRAMP Moderate + on-prem legacy

PRICING

\$25K–\$500K+/yr · enterprise only

STRONGEST MODULES

Doc Control

Training

Quality Events

VALIDATION STANCE

Validated-ready; customer IQ/OQ/PQ with vendor kit

AI FEATURES

AI-assisted document review + quality-event investigation, human-in-the-loop, 30-40% faster investigations (vendor claim). One-button validation.

INTEGRATIONS

Integration Toolkit + API; SAP, LIMS, ERP, MES

KNOWN WEAKNESSES

Clunky reporting · steep learning curve · rigid workflows · pricey for mid-market

Veeva Vault QMS

source

Cloud-native SaaS leader for life sciences; Vault platform spans RIM + Clinical + QMS.

DEPLOYMENT

SaaS only (no on-prem)

PRICING

~\$50–200/user/month + ~\$25K base · implementation \$10K–\$50K SMB

STRONGEST MODULES

Doc Control

Quality Events

Change Control

VALIDATION STANCE

SaaS validation package delivered; customer does risk-based OQ/PQ

AI FEATURES

Vault AI Agents (2025) — deviation triage, CAPA drafting, doc summarisation. Early-pilot: 15–30% faster triage, up to 75% CAPA-cycle reduction.

INTEGRATIONS

Kafka event bus + rich APIs; SAP S/4HANA, Vault LIMS, CrossVault

KNOWN WEAKNESSES

High TCO · customisation rigid outside Veeva's model · tedious setup · UX limits on advanced flows

TrackWise Digital (Honeywell/Sparta)

source

Legacy pharma QMS modernised to cloud; Honeywell acquired Sparta 2020.

DEPLOYMENT

SaaS on Salesforce (Digital); classic on-prem

PRICING

Enterprise only · \$100K–\$1M+/yr

STRONGEST MODULES

Complaints

Deviations/NC

CAPA

VALIDATION STANCE

Validated; Sparta validation kits; classic needs customer validation

AI FEATURES

TrackWise AI / QualityWise-AI — AI Auto-Categorization, Auto-Summarisation, Insights. On AWS SageMaker. Covers Complaints, Deviations, NC, CAPA, Change, Audit.

INTEGRATIONS

ERP, CRM, LIMS, MES; Salesforce-adjacent for Digital

KNOWN WEAKNESSES

Slow page refreshes · dated UI · limited customisation · costly · over-promised config

Caliber EQMS

source

India-origin pharma-focused integrated QMS+DMS+LMS stack; strong APAC/emerging-market.

DEPLOYMENT

Hybrid — on-prem, private cloud, SaaS

PRICING

Lower than US peers · enterprise quote-based

STRONGEST MODULES

Doc Control

Audit/CAPA

OOS/OOT

VALIDATION STANCE

21 CFR 11 + EU Annex 11 + ISO 9001 built-in; customer-led validation

AI FEATURES

Marketing mentions AI-enabled analytics; shipped AI not confirmed publicly.

INTEGRATIONS

Own LIMS + ERP; tight suite integration

KNOWN WEAKNESSES

Thin Western review footprint · UI dated vs Veeva/Qualio · AI story thin

Dot Compliance

source

100% Salesforce-native, ready-to-deploy eQMS for life-science mid-market.

DEPLOYMENT

SaaS on Salesforce

PRICING

~\$10K–\$150K/yr + Salesforce license

STRONGEST MODULES

Doc Control

Training

CAPA/Deviation

VALIDATION STANCE

Pre-validated 'ready-to-deploy' · IQ/OQ templates · customer PQ

AI FEATURES

'Dottie' — industry-first quality-specific AI chat agent for workflow, authoring, compliance Q&A.

INTEGRATIONS

Salesforce AppExchange · REST APIs to ERP/LIMS

KNOWN WEAKNESSES

Salesforce learning curve for non-SF shops · SF license stack pushes TCO · config often needs partner

ComplianceQuest

source

Salesforce-native unified QMS + EHS + PLM for life sciences + regulated manufacturing.

DEPLOYMENT

SaaS on Salesforce

PRICING

Enterprise modular · \$40K–\$400K+/yr

STRONGEST MODULES

Audit

Doc Control

Supplier Quality

VALIDATION STANCE

21 CFR 11 + audit trails + e-sigs + validation docs; customer-assisted validation

AI FEATURES

Generative AI summarisation, risk prediction, IoT telemetry for real-time insights. Specifics less documented than Dot's Dottie.

INTEGRATIONS

Salesforce · SAP · PLM · IoT platforms

KNOWN WEAKNESSES

Higher TCO (SF stack) · complex config for small teams · reporting strong but steep

Qualio

source

Modern approachable eQMS for life-science startups + mid-market; fastest time-to-value in segment.

DEPLOYMENT

SaaS multi-tenant

PRICING

~\$12K–\$120K/yr · starts ~\$12K base

STRONGEST MODULES

Doc Control

Training

Audit/CAPA

VALIDATION STANCE

Pre-validated · IQ/OQ docs ship · customer PQ

AI FEATURES

'Compliance Intelligence' (Oct 2025 GA) — AI gap analysis across FDA QMSR + ISO 13485/9001/27001 + MDSAP; cross-framework monitoring; evidence-to-requirement mapping.

INTEGRATIONS

Jira · Slack · Greenlight Guru · Google · REST API; thinner ERP/LIMS

KNOWN WEAKNESSES

Workflow automation limits · search gaps · not ideal for complex multi-site pharma mfg

ETQ Reliance

source

Multi-industry EQMS (auto/med-device/pharma/food) with deep configurability; rebranding as Octave Reliance.

DEPLOYMENT

SaaS + on-prem · CCU licensing

PRICING

\$50K–\$500K+/yr

STRONGEST MODULES

Doc Control

CAPA

Audit

VALIDATION STANCE

Validation package for pharma/device · customer-led

AI FEATURES

Predictive quality analytics via Acerta partnership; real-time KPIs + trend/pattern detection

INTEGRATIONS

ERP, LIMS, MES via APIs · broad industrial connectors

KNOWN WEAKNESSES

Price creep · UI inconsistency across apps · heavy config for pharma fit · cloud tiers

ValGenesis (VLMS 5.0)

source

Validation-lifecycle leader expanding to full quality suite; only CSA-ready VLMS on market.

DEPLOYMENT

SaaS (primary) + private cloud

PRICING

Enterprise only · \$100K–\$1M+/yr

STRONGEST MODULES

Validation (iVal)

Cleaning Validation

Process Monitoring

VALIDATION STANCE

Validation IS the product · CSA-aligned · strong 21 CFR 11 posture

AI FEATURES

iVal AI-powered authoring, automated test execution, live anomaly flagging, gap-vs-SOP detection. 80% cycle reduction (vendor claim), 90% fewer observations.

INTEGRATIONS

ERP · DCS/PLC (ops data) · CQV tooling · API-driven

KNOWN WEAKNESSES

Primarily validation-focused — weaker pure-play EQMS breadth · thin public review footprint · premium pricing

IQVIA SmartSolve (ex-Pilgrim)

source

20+-module eQMS rebranded under IQVIA; bundled with RIM + analytics + real-world-data.

DEPLOYMENT

SaaS + on-prem

PRICING

Enterprise quote-based · \$75K–\$750K+/yr

STRONGEST MODULES

CAPA

Audit

Complaints/PMS

VALIDATION STANCE

Validated · validation kit delivered

AI FEATURES

AI/ML workflow automation, risk detection, compliance acceleration; overlaps with IQVIA drug-safety AI agents.

INTEGRATIONS

IQVIA RIM · Vigilance · real-world-data · ERP/LIMS via APIs

KNOWN WEAKNESSES

UI dated (clunky NCR notifications) · reporting setup hard · slow modernisation vs cloud-native peers

ComplianceWire (UL)

source

Training-centric compliance LMS for life sciences — 3.6M users, 600 orgs, 153 countries. Not a full EQMS.

DEPLOYMENT

SaaS (validated)

PRICING

Enterprise quote-based

STRONGEST MODULES

Role-based Training

Qualification Mgmt

Compliance Reporting

VALIDATION STANCE

Validated platform · electronic records + audit trails + e-sigs · FDA-co-developed 400+ course catalog

AI FEATURES

Shipped AI features not confirmed on public pages (2022R2 focused on dashboards).

INTEGRATIONS

Connects to Veeva/MasterControl/TrackWise as training-of-record · SSO · SCORM/xAPI

KNOWN WEAKNESSES

Narrow scope (no CAPA/Deviation/Change) · must pair with EQMS · UI dated · limited AI roadmap

4 · Differentiation

Hawkeye's strategic moats

1. AUDITOR MARKETPLACE (RFQ → AWARD)

The only EQMS with a built-in third-party auditor marketplace. CDMOs + mid-market buy audit capacity on-demand. RFQ + quote comparison + rating system. **No competitor ships this.**

2. MULTI-INDUSTRY FROM ONE CODEBASE

Module config + vocabulary overlay → one platform, 7+ industry packs. MasterControl + Veeva are pharma-only; Qualio is life-sci-only; ETQ is multi-industry but pharma-weak. **Hawkeye is the only platform architected for pharma-depth AND multi-vertical breadth.**

3. ASKHAWK — CROSS-MODULE AI ASSISTANT

17-route AI stack with tool-calling across audit/CAPA/evidence. Peers have per-module AI (Veeva Agents, TrackWise AI). **Hawkeye's AskHawk bridges modules and takes actions, not just answers.**

4. REDACTED-VIEW DOCUMENT MODEL

Doc-control serves auditor-safe redacted views from the same source of truth. **Rare primitive — enables confidential supplier audits without data leakage.**

5. PUBLIC-SIGNAL SUPPLIER RISK

FDA 483, warning letters, import alerts feed directly into supplier risk scores. **Competitors require manual risk inputs; Hawkeye's is automated.**

6. IMMUTABLE RECORDS BY DEFAULT

Hash-chain + dataIntegrityLog + ALCOA+ model built-in. On the roadmap: WORM anchoring + optional blockchain proof. **Turns FDA integrity proof from a 6-week exercise to a single API call.**

Where Hawkeye is behind (catch-up list)

VALIDATION KITS

Qualio + Dot + MasterControl ship pre-validated packages. Hawkeye's is on the Q4 2026 roadmap.

SSO + MFA

Enterprise table-stakes. `requireMFA` flag exists but not wired. Q3 2026.

MULTI-LLM + VECTOR DB

OpenAI + in-memory today. Q2 2026 upgrade.

INTEGRATION MARKETPLACE

SAP/Veeva/LIMS/MES connectors as a product — Q2 2027.

5 · Product Vision

Product vision — 24-month arc

Three narratives compound over 24 months: **trust** (immutable audit trail + validated SaaS), **intelligence** (AI that takes action, not just answers), and **reach** (multi-vertical industry packs). Each phase builds on the last.

Today (Q4 2025)

Gaps

- Multi-tenancy enforced by convention, not middleware
- Hash-chaining fields exist but never computed
- No observability (no Pino/Prometheus/OTel/Sentry)
- No async queue, no outgoing webhooks
- Single-vendor LLM (OpenAI)
- No SSO/MFA implementation (flags only)
- No IaC, no multi-region, no DR

Phase 1 · Q1–Q2 2026 — Trust Layer

Delivers

- Integrity proofs for FDA
- Observability for SOC 2
- Multi-LLM + scalable RAG
- Async-first eventing

Phase 2 · Q3–Q4 2026 — Platform Layer

Delivers

- Tenant-authored workflows
- Multi-vertical in one platform
- Enterprise auth story
- Analytics at lake scale

Phase 3 · Q1–Q2 2027 — Validated SaaS + IoT + Agentic AI

Delivers

- Live IoT → CAPA
- Validated SaaS (delivered)
- Agentic AI (acts, not just answers)
- Tamper-proof immutable records

Phase 4 · Q3–Q4 2027 — Global Scale + Adjacencies

Delivers

- Data residency per region
- Partner ecosystem (PLG)
- GRC + Clinical adjacencies
- FedRAMP Moderate in-process

6 · Roadmap (board view)

24-month roadmap · board-relevant initiatives

Only epics tagged **board** or **both** are shown. For the full engineering view, see the Engineering pack.

Q1 2026	Harden foundations + ship Annex 11 package	
	Audit-trail hash-chaining + content-hash	BOTH
	Complete SHA-256 hash-chain in dataIntegrityLogModel. Every record change emits an immutable link. Output: cryptographic proof of record integrity to FDA inspectors.	
	Annex 11 2026 compliance package	BOARD
	Deliver validation kit + config templates for the new Annex 11 draft reqs (cybersecurity, DR, AI validation). Pre-sell to EU pharma buyers.	
	Multi-framework doc-tagging (FDA + ISO 13485 + ISO 9001)	BOTH
	Like Qualio Compliance Intelligence. Tag one doc against many regs; dashboard shows coverage per framework.	

Q2 2026	AI-first deviation & CAPA	
	Deviation / CAPA AI co-pilot	BOTH
	LLM drafts RCA (5-why, fishbone) + CAPA plan from deviation narrative. Target: 40% cycle reduction (Veeva pilot parity).	
	AI Agent cost + quality dashboard	BOARD
	Per-tenant AI spend + accuracy + confidence distribution. Pricing lever.	
	Regulatory feed: EMA + MHRA + PMDA	BOTH
	Expand from FDA-only. Multi-agency RSS + LLM summariser + tenant-matching.	

Q3 2026

Workflow engine + industry packs v1

No-code workflow builder (state-machine editor)

BOTH

Lift the existing workflowDefinition model into a visual editor. Tenants design their own CAPA approval chains without engineering.

Medical Device vertical (QMSR-ready)

BOTH

Design Controls + Complaints/PMS pack. Target FDA QMSR Feb 2026 compliance. First industry-pack template.

ISO 9001 pack + vocabulary overlay

BOARD

Strip pharma-specific language; ship ISO 9001 generic-manufacturing config. Open up the 6-8x larger vertical market.

Q4 2026

Validation-as-code + data lake

Validation kit generator

BOTH

Auto-generate IQ/OQ/PQ + RTM from tenant config. Cut validation effort from 6 months to 4 weeks (ValGenesis CSA parity).

Cross-module analytics dashboards

BOTH

KPI dashboard spanning deviations + CAPAs + audits + training + supplier risk. Auto-populates MRM inputs.

Supplier public-signal ingestion (FDA 483/WL + import alerts)

BOTH

Close the supplier-quality loop. Public compliance events auto-update risk score. Differentiator.

Food Safety vertical (FSMA + HACCP)

BOARD

Second industry pack. Demonstrates the platform-of-platforms story.

Q1 2027

Enterprise validation + marketplaces

Validated SaaS (delivered)

BOARD

Published validation package — customers accept as-is; shortens sales cycle by 3-6 months.

Auditor marketplace scale-up

BOARD

Move from 10s to 100s of vetted auditors. Global regions. Specialty tags (biologics, ADCs, combination products).

Automotive vertical (IATF 16949 + APQP/PPAP)

BOARD

Third industry pack. Tier 1/2/3 auto suppliers.

Q2 2027

Predictive quality + AI agents

Predictive deviation signal detection

BOTH

ML on historical deviation streams — flag emerging process drift before it fails. (Acerta/ETQ parity.)

AskHawk agentic workflows

BOTH

AskHawk doesn't just answer — it acts. 'Close these 3 overdue CAPAs' with citations and e-sig requests.

Partner integration marketplace (SAP + Veeva + LIMS + MES)

BOARD

Certified connector program. Turn integration from a 6-month blocker into an app-store install.

GxP + SOC 2 + ISO 27001 certifications

BOARD

Audit certifications in-hand; unlocks enterprise tier. Typically adds 15-20% ACV.

Q3 2027

Global scale + vertical roll-up

Aerospace + Forestry + Organic packs

BOARD

Industry-pack factory — 3 new verticals shipped in a quarter via pack templates (time-to-market under 6 weeks each once engine is ready).

Customer-admin toolkit (tenant onboarding self-serve)

BOTH

New tenant goes from signup → first CAPA in <10 minutes. Reduces CSM load, enables PLG motion.

Q4 2027

Platform maturity + adjacencies

GRC extension (Risk Register + Controls + Audit 2-in-1)

BOARD

Extend upwards into GRC. Overlaps with LogicGate/AuditBoard but integrated with QMS data. Targets CFO buyer in addition to CQO.

Clinical adjacency (eTMF + CTMS hooks)

BOARD

Light integration with clinical systems. Expands TAM into clinical ops.

AI-gen validation content + SOP authoring at scale

BOTH

LLM-generated SOP first-drafts from regulatory source → editor → approval. Compresses doc-create time 10×.

7 · Industry Verticals

Beyond pharma — multi-vertical opportunity

The same module config + vocabulary overlay that powers pharma supports every major regulated industry. Industry packs ship in 6-week cycles once the vertical-factory engine (Q3 2026) is live.

Broader QMS market: USD 12.52B (2025) → USD 31.54B (2034) at 10.81% CAGR — roughly **6–8× the pharma-only envelope**. Pharma is 12–15% of the total. (Fortune BI)

VERTICAL-SPECIFIC MODELS

Provenance tracking, Appraisal records, Beneficial-owner checks, Sanctions screening

CUSTOMER EXAMPLES

Art dealers · luxury retail · gems/jewellery

8 · Investment Asks

What we're asking for

CAPITAL

Enables: engineering build-out of Phase 1 + 2 (trust layer + platform layer), go-to-market team for mid-market pharma + CDMO, validation-kit + certification investments (SOC 2, ISO 27001, FedRAMP entry).

DESIGN PARTNERS

5–10 mid-market pharma + CDMO logos at friends-and-family pricing. Their production use drives the validation kit, Annex 11 package, and Medical Device vertical.

ADVISORY

QA exec bench (ex-FDA, ex-Big Pharma quality). Two SEs with MasterControl/Veeva deployment experience. A CFO-bench member.

PARTNERSHIPS

Referral partnerships with CROs/CDMOs, validation consultancies, Big-4 life-sciences practices. CRO/CDMO-tied deal flow closes 50% faster.

Key risks + mitigations

VALIDATION DELAYS SALES CYCLE

Mitigate: ship validated SaaS (Q4 2026) → shrink cycle 3-6 months.

ENTERPRISE PREFERS INCUMBENTS

Mitigate: don't fight Veeva in Big Pharma; own mid-market + CDMO. Let incumbents age into replacement cycles.

AI OVER-PROMISED

Mitigate: every AI feature cites its source doc. No ungrounded generation. Demos show live citation trails.

REGULATORY DRIFT

Mitigate: Annex 11 2026 + QMSR Feb 2026 + DSCSA already in the Q1–Q4 2026 roadmap. We ship compliance as a product.
