1. Module overview

Module	Audit Request / RFQ (marketplace audit flow)
Pharma purpose	Buyer posts an audit RFQ. Multiple auditor orgs submit quotes. Buyer shortlists + awards. Awarded quote converts into a full audit request that enters the 8-phase audit lifecycle.
Compliance basis	ICH Q10 §2.7 · ISO 19011 §5.3 · contract audit governance
Hawkeye routes	/rfqs, /rfqs/[id], /request-audit (frontend) · /api/rfqs, /api/audit-requests (backend)
Hawkeye model file	backend/src/models/auditRfqModel.js · auditRfqQuoteModel.js · auditRfqThreadModel.js
Tenant module flag	modules.RFQ

RFQs follow DRAFT → PUBLISHED → IN_QA → QUOTES_RECEIVED → SHORTLISTED → AWARDED → CONVERTED. Quote rows follow DRAFT → SUBMITTED → REVISED / WITHDRAWN / ACCEPTED / REJECTED. An awarded quote auto-creates an audit-requests-master row that enters the 8-phase audit lifecycle.

2. Standard pharma EQMS vs Hawkeye — gap analysis

Each row is a capability a pharma QA team would expect from an EQMS deviation module. Hawkeye column shows what's actually shipped. **MET** = parity, **PARTIAL** = ships but with caveats, **GAP** = not implemented yet.

Pharma expectation	Hawkeye implementation	Status	Note
RFQ lifecycle (DRAFT → AWARDED → CONVERTED) —	9-state enum.	MET	
Per-auditor quote lifecycle (DRAFT → SUBMITTED → ACCEPTED/REJECTED) —	6-state enum on auditRfqQuoteModel.	MET	
Auto-numbered RFQ (RFQ-XXXXXX) GMP	Pre-save generator.	MET	
Invitations to specific auditor orgs —	invitedAuditors[] subdocument with status (INVITED / DECLINED / ACCEPTED_VIEW).	MET	
Q&A threads between buyer + auditor —	auditRfqThreadModel.	MET	
Quote line items + totals + proposed schedule —	lineItems[] + totals { subtotal, tax, total } + proposedSchedule.	MET	
Award + auto-convert to audit request —	POST /:id/award sets awardedQuoteld; downstream auto-creates audit-requests-master.	MET	
Closing date + auto-EXPIRE —	closingAt field. Auto-expire on roadmap.	PARTIAL	Add cron

3. Personas + role mapping

Login password for every persona: `EqmsDemo@2026` . Roles drive which API endpoints respond — see Hawkeye `roleMiddleware.permit()` .

Persona	Email	Responsibilities in this module	Lifecycle states they touch
Audit Program Mgr Priya buyer	<code>audit.program@novex-pharma.demo</code>	Drafts RFQ, publishes, invites auditor orgs, shortlists, awards.	DRAFT PUBLISHED SHORTLISTED AWARDED

Persona	Email	Responsibilities in this module	Lifecycle states they touch
Auditor (external auditor org) auditor	(auditor-side login)	Receives invite, submits quote, revises after Q&A.	(quote) DRAFT SUBMITTED REVISED
Audit Lead Maria (auditor) auditor	audit.lead@novex-pharma.demo	Internal-tenant equivalent — submits quotes from Maria's auditor org.	(quote) DRAFT SUBMITTED

6. AI assistance map

Each AI assist is a separate endpoint. Outputs flow through the grounded-generation runtime (citation gate, confidence floor, schema validation, accept/reject audit trail).

AI agent	Attached to state(s)	Endpoint	Where in UI	What it returns	Provider
----------	----------------------	----------	-------------	-----------------	----------

7. Regulator-trace matrix

For each lifecycle state, the specific clauses + evidence Hawkeye captures so an inspector can audit the record. Maps to FDA / ISO / ICH / EU GMP source clauses.

State	Cited clauses	Evidence captured	Backing records
PUBLISHED	–	title + scope + invitedAuditors[]	audit-rfqs
AWARDED	–	awardedQuoteld + buyer signature on award	audit-rfqs + audit-rfq-quotes
CONVERTED	ISO 19011 §5.3	rfqId link from new audit-request to source RFQ	audit-requests-master + audit-rfqs

8. Test results matrix
