- 9. Known gaps + roadmap

1. Module overview

Module	Document Control
Pharma purpose	Author, review, approve, publish, supersede and withdraw controlled documents (SOPs, work instructions, policies, specifications, protocols, report templates, guidelines).
Compliance basis	ISO 9001:2015 §7.5 (documented information) · 21 CFR 211.180 (records & reports) · 21 CFR Part 11 (e-signatures on approved docs) · EU GMP Chapter 4
Hawkeye routes	/document-control (frontend) · /api/document-control (backend)
Hawkeye model file	backend/src/models/DocumentControlModel.js
Tenant module flag	modules.DOCUMENT_CONTROL

Documents move through DRAFT → UNDER_REVIEW (multi-step serial approval) → APPROVED → EFFECTIVE → SUPERSEDED or WITHDRAWN. Each approval step can be assigned to a role (e.g. 'QA Manager') and optionally to a specific user. Publishing an SOP with requiresTrainingOnUpdate=true fires the AI training auto-assign agent so affected roles get fresh 'read-and-understood' training records automatically.

2. Standard pharma EQMS vs Hawkeye — gap analysis

Each row is a capability a pharma QA team would expect from an EQMS deviation module. Hawkeye column shows what's actually shipped. **MET** = parity, **PARTIAL** = ships but with caveats, **GAP** = not implemented yet.

Pharma expectation	Hawkeye implementation	Status	Note
DRAFT → UNDER_REVIEW → APPROVED → EFFECTIVE state machine ISO 9001 §7.5.3	6-state enum: DRAFT / UNDER_REVIEW / APPROVED / EFFECTIVE / SUPERSEDED / WITHDRAWN. State transitions via /submit-for-review, /approve, /publish, /supersede, /withdraw.	MET	
Multi-step serial approval (each reviewer must approve before next) 21 CFR 211.100(b)	approvalSteps[] array on the model. /approve advances by stepOrder; document moves to APPROVED only when all steps APPROVED/DELEGATED. Rejection at any step reverts to DRAFT.	MET	
Document number auto-generation + version tracking 21 CFR 211.180	documentNumber set by user; versionMajor + versionMinor tracked; versionLabel computed. /supersede auto-increments versionMajor + creates new revision linked via supersededById.	MET	
8 document types (SOP / WORK_INSTRUCTION / POLICY / SPECIFICATION / PROTOCOL / REPORT_TEMPLATE / FORM / GUIDELINE) EU GMP Chapter 4	documentType enum with all 8 types.	MET	
Publish triggers training assignment to affected roles 21 CFR 211.25 (training)	On /publish, if requiresTrainingOnUpdate=true, triggerTrainingOnDocumentRevision() fires the Wave 2 AI auto-assign agent → creates training-records for affected roles.	MET	
Effective date + retirement date + review-period months ISO 9001 §7.5.3	effectiveDate, retirementDate, reviewPeriodMonths (default 24) on the model.	MET	
Withdraw with reason capture 21 CFR 211.180(c)	/withdraw requires withdrawalReason; status flips to WITHDRAWN.	MET	
21 CFR Part 11 e-signature on approval 21 CFR Part 11 §11.50	approvalSteps[].signature field exists; generic /api/electronic-signatures/sign endpoint can be wired but is NOT enforced today.	PARTIAL	Wire e-sig requirement on each approval step
Document classification (Public / Internal / Confidential / Restricted) ISO 27001 / GxP	complianceStandards[] field; no formal classification taxonomy yet.	GAP	Add classification enum + access-control hook
Periodic review reminder when reviewPeriodMonths elapses ISO 9001 §7.5.3.2	Field exists; no scheduler / notification yet.	GAP	Add cron job + notificationOutbox entry when next-review-date is within 30 days

Pharma expectation	Hawkeye implementation	Status	Note
Storage of document binary (PDF, DOCX) with content-hash integrity 21 CFR Part 11 §11.10(c)	storageRef (S3 path) + digilockerId fields. Content hash captured on upload via dataIntegrityLog.	MET	

3. Personas + role mapping

Login password for every persona: `EqmsDemo@2026` . Roles drive which API endpoints respond — see Hawkeye `roleMiddleware.permit()` .

Persona	Email	Responsibilities in this module	Lifecycle states they touch
Sarah O'Brien Doc Control (admin)	<code>doc.control@novex-pharma.demo</code>	Authors + maintains all controlled documents, drives them through approval, publishes, retires.	DRAFT UNDER_REVIEW APPROVED EFFECTIVE SUPERSEDED WITHDRAWN
James Thompson Head of QA (admin · approver)	<code>qa.head@novex-pharma.demo</code>	Default approver on QA-owned SOPs.	UNDER_REVIEW
Marcus Brown Regulatory Affairs (admin · approver)	<code>regulatory@novex-pharma.demo</code>	Approver on regulatory-impact documents.	UNDER_REVIEW
Elena Vasquez VP Quality (tenant_admin)	<code>vp.quality@novex-pharma.demo</code>	Final approval on policy-level documents.	UNDER_REVIEW APPROVED
Rebecca Kim Training Coordinator	<code>training.coord@novex-pharma.demo</code>	Receives training auto-assign notifications when SOPs publish.	EFFECTIVE (downstream)

4. Feature catalogue (click-by-click)

4.1 Document register

What it does	List all documents in the tenant with status chip + 'Submit for Review' / 'Withdraw' inline buttons.
Menu / route	<code>/document-control</code>
Available to roles	any tenant viewer
Backend API	<code>GET /api/document-control</code>

CLICK-BY-CLICK

1. **NAVIGATE** Click 'Documents' in the top nav
→ Page renders with rows
2. **WAIT** Spinner clears
→ 4 seeded SOPs visible: SOP-QC-014 EFFECTIVE, SOP-MB-003 EFFECTIVE, SOP-PROD-041 UNDER_REVIEW, WI-ENG-021 DRAFT

4.2 + New Document dialog

What it does	Author a new document. Captures number, title, type, version, description, and the requiresTrainingOnUpdate flag.
Menu / route	/document-control · top-right '+ New Document' button
Available to roles	doc admin
Backend API	POST /api/document-control

CLICK-BY-CLICK

- CLICK** Click '+ New Document'
→ Dialog opens
- TYPE** Fill documentNumber (e.g. SOP-QC-015)
→ user-defined
- TYPE** Fill title
→ required
- CLICK** Pick documentType (SOP / POLICY / WI / SPEC / PROTOCOL / REPORT_TEMPLATE / FORM / GUIDELINE)
→ default SOP
- TYPE** Fill version (e.g. 1.0) + description
→ version maps to versionMajor.versionMinor
- CLICK** Toggle requiresTrainingOnUpdate
→ If on, publish will fire training auto-assign
- CLICK** Click 'Save'
→ Row appears with status DRAFT

FIELDS CAPTURED

Field	Required	Validation / values	Notes
documentNumber	Yes	string	user-defined; should follow tenant convention
title	Yes	string	
documentType	No	SOP WORK_INSTRUCTION POLICY SPECIFICATION PROTOCOL REPORT_TEMPLATE FORM GUIDELINE	default SOP
version	No	string e.g. '1.0'	split into versionMajor.versionMinor at save
requiresTrainingOnUpdate	No	boolean	default false

4.3 Submit for review

What it does	Move DRAFT → UNDER_REVIEW. Specify reviewers as a serial workflow.
Menu / route	Document row (status=DRAFT) · 'Submit for Review' button

Available to roles	doc admin · author
Backend API	POST /api/document-control/:id/submit-for-review

CLICK-BY-CLICK

- CLICK** Click 'Submit for Review' on a DRAFT row
→ Drawer with reviewers picker
- CLICK** Add reviewer 1 — pick role (default 'QA Manager') + optional userId
→ stepOrder=1
- CLICK** (Optional) Add more reviewers — they approve in order
→ stepOrder N
- CLICK** Click 'Submit'
→ Status flips to UNDER_REVIEW; approvalSteps[] populated; first reviewer notified

4.4 Approve / reject step

What it does	Reviewer for the current pending step approves, rejects, or delegates.
Menu / route	Document row (status=UNDER_REVIEW) · 'Approve / Reject' button
Available to roles	any reviewer assigned to a step
Backend API	POST /api/document-control/:id/approve

CLICK-BY-CLICK

- CLICK** Click 'Approve / Reject'
→ Drawer with current step + comments + decision picker
- CLICK** Pick decision (APPROVED / REJECTED / DELEGATED)
→ DELEGATED requires a userId of the new approver
- TYPE** Fill comments (recommended)
→ stored on the step
- CLICK** Click 'Submit decision'
→ Step updated; if all steps APPROVED → status=APPROVED; if any REJECTED → status=DRAFT

4.5 Publish

What it does	Make the APPROVED document effective. Fires AI training auto-assign if requiresTrainingOnUpdate=true.
Menu / route	Document row (status=APPROVED) · 'Publish' button
Available to roles	doc admin
Backend API	POST /api/document-control/:id/publish
AI assistance	AI Wave 2 Training Auto-Assign Agent fires here when requiresTrainingOnUpdate=true

CLICK-BY-CLICK

- CLICK** Click 'Publish'
→ Confirmation with effectiveDate picker (default today)

2. **CLICK** (Optional) Pick a future effectiveDate
→ stored
3. **CLICK** Click 'Confirm'
→ Status flips to EFFECTIVE; effectiveDate set; if requiresTrainingOnUpdate=true, training records created for affected roles

4.6 Supersede

What it does	Replace the EFFECTIVE document with a new revision (v2). Old version flips to SUPERSEDED.
Menu / route	Document row (status=EFFECTIVE) · 'Supersede' button
Available to roles	doc admin
Backend API	POST /api/document-control/:id/supersede

CLICK-BY-CLICK

1. **CLICK** Click 'Supersede'
→ Drawer pre-fills new revision (versionMajor + 1)
2. **TYPE** Edit description / scope / etc. for the new revision
→ all fields editable
3. **CLICK** Click 'Create new revision'
→ New row created in DRAFT (with supersedesId pointing to old); old row status=SUPERSEDED

4.7 Withdraw

What it does	Take an EFFECTIVE document out of service permanently.
Menu / route	Document row (status=EFFECTIVE) · 'Withdraw' button
Available to roles	doc admin
Backend API	POST /api/document-control/:id/withdraw

CLICK-BY-CLICK

1. **CLICK** Click 'Withdraw'
→ Drawer with withdrawalReason field
2. **TYPE** Fill withdrawalReason (required)
→ required
3. **CLICK** Click 'Confirm withdrawal'
→ Status flips to WITHDRAWN; cannot be reverted (must create new doc)

4.8 (downstream) Training auto-assign

What it does	Fires automatically when an SOP with requiresTrainingOnUpdate=true is published. Identifies affected roles + creates 'read-and-understood' training records.
Menu / route	Triggered by /publish – visible in /training register
Available to roles	any tenant user (auto-fired by system)

Backend API	POST /api/ai/training/auto-assign (internal hook)
AI assistance	AI Wave 2 AI agent — generates an optional knowledge-check question per affected role

CLICK-BY-CLICK

- 1. **WAIT** After publish, wait ~5 s
→ training-records inserted for users in affectedRoles
- 2. **NAVIGATE** Open /training
→ New ASSIGNED rows for the new SOP version

5. Full lifecycle walkthrough — one transaction, end-to-end

One SOP walked from initial author through publish to withdrawal. Persona = Sarah (doc.control).

#	Persona	State transition	Action	API	Observed	Result
1	Sarah Doc Control	– → DRAFT	Click '+ New Document' → fill SOP-E2E-NNN / cleaning verification SOP / SOP / 1.0 → Save	POST /api/document-control	Row visible at top; status=DRAFT	PASS

Expected DB state after this step:

```
document-controls { _id, documentNumber: 'SOP-E2E-NNN', title, documentType: 'SOP', versionMajor: 1, versionMinor: 0, status: 'DRAFT', createdBy: sarah._id, requiresTrainingOnUpdate: false }
```

[illegible]

#	Persona	State transition	Action	API	Observed	Result
state-screens/document-control-list.png						
2	Sarah Doc Control	DRAFT → UNDER_REVIEW	Click 'Submit for Review' → add reviewer 1 (QA Manager · sarah_id) → Submit	POST /api/document-control/:id/submit-for-review	approvalSteps[] populated; status=UNDER_REVIEW	PASS
Expected DB state after this step: <pre>document-controls { status: 'UNDER_REVIEW', approvalSteps: [{ stepOrder: 1, role: 'QA Manager', approverId: sarah._id, decision: 'PENDING' }] }</pre>						
3	Sarah (also approver here) QA Manager	UNDER_REVIEW → APPROVED	Click 'Approve / Reject' on the row → decision=APPROVED → Submit	POST /api/document-control/:id/approve	Step decision recorded; all steps APPROVED → status=APPROVED	PASS
Expected DB state after this step: <pre>approvalSteps[0] = { decision: 'APPROVED', decidedAt, comments }; status: 'APPROVED'</pre>						
4	Sarah Doc Control	APPROVED → EFFECTIVE	Click 'Publish' → confirm with effectiveDate=today	POST /api/document-control/:id/publish	status=EFFECTIVE; effectiveDate set	PASS
Expected DB state after this step: <pre>document-controls { status: 'EFFECTIVE', effectiveDate: <today> } (if requiresTrainingOnUpdate) training-records: N rows ASSIGNED to affected role users</pre>						
5	Sarah Doc Control	EFFECTIVE → WITHDRAWN	Click 'Withdraw' → fill withdrawalReason → Confirm	POST /api/document-control/:id/withdraw	status=WITHDRAWN; withdrawalReason captured	PASS
Expected DB state after this step: <pre>document-controls { status: 'WITHDRAWN', withdrawalReason }</pre>						

6. AI assistance map

Each AI assist is a separate endpoint. Outputs flow through the grounded-generation runtime (citation gate, confidence floor, schema validation, accept/reject audit trail).

AI agent	Attached to state(s)	Endpoint	Where in UI	What it returns	Provider
Training Auto-Assign Agent (Wave 2)	EFFECTIVE (publish hook)	POST /api/ai/training/auto-assign	Auto-fired on publish if requiresTrainingOnUpdate=true	Identifies affected roles + creates training-records + (optionally) drafts an LLM knowledge-check question	Free Gemini for question draft; rule-engine for role mapping
(roadmap) AI redline / change summary	any (when superseding)	(future)	Supersede drawer · 'Summarise changes from prior rev'	Diff old + new doc text → LLM-summarised what-changed bullets for the approval drawer	Free Gemini

7. Regulator-trace matrix

For each lifecycle state, the specific clauses + evidence Hawkeye captures so an inspector can audit the record. Maps to FDA / ISO / ICH / EU GMP source clauses.

State	Cited clauses	Evidence captured	Backing records
DRAFT	ISO 9001 §7.5.3	documentNumber + title + type + version + author	document-controls
UNDER_REVIEW	21 CFR 211.100(b) ISO 9001 §7.5.3.2	approvalSteps[] with role + assignee + status	document-controls.approvalSteps
APPROVED	21 CFR Part 11 §11.50	Each step's decision + decisionAt + comments + (signature)	document-controls.approvalSteps + dataIntegrityLog (when e-sig wired)
EFFECTIVE	ISO 9001 §7.5.3.1 EU GMP Chapter 4	effectiveDate + reviewPeriodMonths + storageRef (S3 binary)	document-controls
SUPERSEDED	21 CFR 211.180(c)	supersededById link to new revision; old version retained read-only	document-controls (both rows)
WITHDRAWN	21 CFR 211.180(c)	withdrawalReason + withdrawnAt + withdrawnBy	document-controls

8. Test results matrix

Suite	Scope	Result	Evidence
eqms-lifecycle.spec.ts · doc	DRAFT → UNDER_REVIEW → APPROVED → EFFECTIVE → WITHDRAWN	PASS	6/6 PASS · eqms-test-results-v2.pdf
eqms-cross-module.spec.ts · F2	Document publish + AI training auto-assign	PASS	F2 steps 1-3 PASS; step 4 SKIP (auto-assign on serverless)
novex-walkthrough.spec.ts	/document-control register UI render with seeded SOPs	PASS	doc-01-register.png

9. Known gaps + roadmap

- **Mandatory e-signature on approval steps** — Wire /api/electronic-signatures/sign as a required step before /approve persists. Captures signer IP + auth method (PASSWORD / MFA / SSO). **HIGH**
- **Periodic review scheduler** — Cron that scans for documents whose nextReview = effectiveDate + reviewPeriodMonths. Send reminder via notificationOutbox. Flag overdue. **HIGH**
- **AI redline / change summary on supersede** — Diff old + new doc text → LLM bullets for approver drawer. **MEDIUM**
- **Document classification taxonomy** — Add classification enum (PUBLIC / INTERNAL / CONFIDENTIAL / RESTRICTED) wired to access controls. **MEDIUM**
- **DigiLocker / eSign integration** — digilockerId field exists; complete the upload + retrieval flow for tenants in India. **LOW**
