

Novex EQMS · Executed click-by-click guide

Live Vercel deployment — generated 2026-04-24T14:57:39.461Z. Every step below was executed against `https://hawkeye-backend-dev.vercel.app` via a Playwright walkthrough, and the screenshot shown was captured right after the listed action completed.

Summary

Live frontend	<code>https://hawkeye-frontend-dev-chi.vercel.app</code>
Live backend	<code>https://hawkeye-backend-dev.vercel.app</code>
Tenant	Novex Pharma Inc. · 69e64e7869b2ba745d40bb89
LLM provider	Google Gemini 2.5 Flash-Lite (free tier)
Step outcomes	43 PASS · 1 SKIP · 0 FAIL
Action legend	NAVIGATE open URL · TYPE fill field · CLICK button / link · WAIT for content · API curl call

0. Pre-flight · verify the live backend (10 seconds)

Goal: Confirm the serverless backend is warm. No local setup needed.

Persona: (anyone)

API curl -s https://hawkeye-backend-dev.vercel.app/healthPASS

→ Returns {"ok":true,"runtime":"serverless"}

Observed: {"ok":true,"initialized":false,"runtime":"serverless"}

API BASE=https://hawkeye-backend-dev.vercel.app node scripts/smoke-test-ai-waves.mjsPASS

→ At least 11/12 PASS across Wave 1-3 endpoints

Observed: 11 PASS · 1 SKIP (low-confidence fallback) · 0 FAIL on free Gemini

API BASE=https://hawkeye-backend-dev.vercel.app node scripts/smoke-test-audit-agents.mjsPASS

→ At least 9/10 PASS across audit agents

Observed: 9 PASS · 1 SKIP (no audits seeded for report assembly) · 0 FAIL

1. Scene 1 · Landing & login (Kenji · QA Specialist · role=admin)

Goal: Log in and confirm the admin lands on the EQMS console with all modules in the sidebar.

Persona: **Kenji**

NAVIGATE

<https://hawkeye-frontend-dev-chi.vercel.app/auth/signin>

PASS

→ Login page renders with email + password fields.

TYPE

Email field = qa.specialist@novex-pharma.demo

PASS

→ Field populated.

TYPE

Password field = EqmsDemo@2026

PASS

→ Field populated.

CLICK

"Sign in" button

PASS

→ Redirects to /audits (admin home). 'Admin' chip appears top-right, sidebar has 13 module tiles.

WAIT

page fully loaded

PASS

→ Audit Summary card visible with counters.

01-kenji.png · Landed on the EQMS console

2. Scene 2 · Deviations register + AI actions on a deviation (Kenji)

Goal: Open the deviations list. Open a deviation's View+AI drawer. Trigger 5-Why, Draft-CAPA-RCA, and see the Predictive-CAPA badge — all live AI calls.

Persona: **Kenji**

CLICK

"Deviations" in top nav (or navigate to /nonconformance)

PASS

→ List of 3 seeded deviations (DEV-DEMO-001/002/003). Counter shows '3 total · 3 open'.

Observed: 3 deviations: OOS dissolution NVX-2026-B014, calibration drift Korsch XL-400, viable contamination Grade C CA-2.

View + AIInvestigate

CLICK

"View + AI" button on any row (try DEV-DEMO-003)

PASS

→ Right-side drawer slides in. Shows classification + status chips, full description, 'AI actions' section with two buttons, and an auto-rendered AI prediction card.

Observed: Drawer shows MINOR + UNDER INVESTIGATION chips, description, and AI prediction: P(on-time)=81% · P(effective)=66%.

03-kenji.png · Deviation detail drawer – AI actions visible

CLICK

"Scaffold 5-why with AI" button (in the drawer)

PASS

→ Popover opens. Live POST /api/ai/deviation/scaffold-five-why. Response shows 5 whys with citations and 6M categorisation.

Observed: Popover shows 5-why chain grounded in SOP-QC-014:3.2. Provider=gemini-2.5-flash-lite.

04-kenji.png · AI · 5-Why scaffold popover

CLICK

"Draft CAPA RCA" button (in the drawer)

PASS

→ Full-width drawer-in-drawer with 'AI-drafted RCA' header + severity + draft RCA + proposed corrective/preventive actions + effectiveness plan.

Observed: AI-drafted RCA rendered in ~337 ms on gemini-2.5-flash-lite. Shows 5-Why chain + Accept/Reject controls at the bottom.

05-kenji.png · AI · CAPA RCA drafter drawer

WAIT

close the drawer (Escape)

PASS

→ Drawer dismisses; you're back on the list.

NAVIGATE

https://hawkeye-frontend-dev-chi.vercel.app/buyer/capas

PASS

→ CAPA workspace renders (v2).

3. Scene 3 · Supplier Intel on a real firm (Priya · Audit Program Mgr · role=buyer)

Goal: Log in as buyer. Open the supplier register. Fire the AI Supplier-Intel agent against a real-world pharma firm.

Persona: **Priya**

NAVIGATE

https://hawkeye-frontend-dev-chi.vercel.app/auth/signin

PASS

→ Login page.

TYPE

Email = audit.program@novex-pharma.demo, Password = EqmsDemo@2026

PASS

→ Credentials entered.

CLICK

"Sign in"

PASS

→ Redirects to buyer landing. 'Buyer' chip top-right, buyer nav visible.

08-priya.png · Buyer home — audit program view

NAVIGATE

<https://hawkeye-frontend-dev-chi.vercel.app/buyer/suppliers>

PASS

→ Supplier Risk Summary page with filter bar + tenant supplier table.

The screenshot shows the 'Supplier Risk Summary' page. At the top is a navigation bar with various icons and a 'Buyer' profile. Below the navigation bar, the page title 'Supplier Risk Summary' is displayed. A filter bar contains a 'Search supplier' input, dropdowns for 'Band' and 'Trend' (both set to 'All'), and input fields for 'Min score' and 'Max score'. Below the filter bar are buttons for 'Fuzzy search', 'Density' (set to 'Standard'), 'View', 'Save As', 'Save View', 'Reset', 'Manage', 'Export to CSV', and 'Manage Columns'. A table with the following columns is shown: Supplier, Contact, Risk Band, Final Score, Trend, and Last Calculated. The table contains one row: Novex Pharma Inc. - Production, Michael Foster, Unknown, -, FLAT, -.

Supplier	Contact	Risk Band	Final Score	Trend	Last Calculated
Novex Pharma Inc. - Production	Michael Foster	Unknown	-	FLAT	-

09-priya.png · Suppliers register (tenant-registered)

NAVIGATE

<https://hawkeye-frontend-dev-chi.vercel.app/audits>

PASS

→ Audit register loads.

The screenshot shows the 'Audit Summary' page. At the top is a navigation bar with various icons and a 'Buyer' profile. Below the navigation bar, the page title 'Audit Summary' is displayed. A filter bar contains a 'Selected audits: 0' label, a 'View' dropdown (set to 'Active audits'), and buttons for 'Archive selected', 'Archive all on page', and 'Clear selection'. Below the filter bar is a large empty box with a circular icon and the text 'You don't have any audit'.

10-priya.png · Audits register (all internal + external)

→ Request-audit form renders (where Priya kicks off a supplier audit).

Request Audit

Request New Audit

⚠ Request creation is incomplete until you send the Intimation Letter. PAQ is optional and can be sent now or later by the assigned auditor.

high-risk signals: 2

confidence: 0.90

PLAN SUMMARY

This audit plan prioritizes sections related to manufacturing controls, quality control, and supplier management due to a recent FDA recall for particulate matter contamination and multiple FDA warning letters issued to Sun Pharmaceutical Industries Ltd. The plan incorporates new questions to address these specific risks, while deprioritizing less critical areas.

HIGH-RISK SIGNALS FLAGGED FROM PUBLIC DATA

- FDA recall for particulate matter (D-0569-2023)
- Multiple FDA warning letters issued to Sun Pharmaceutical Industries Ltd.

RISK-WEIGHTED SECTIONS

high

Quality Management Systems

Multiple FDA warning letters (SOURCE_3) indicate systemic quality issues, necessitating a high level of scrutiny on the overall QMS effectiveness.

3 questions

high

Manufacturing Controls

The FDA recall for particulate matter (SOURCE_2) directly points to a failure in manufacturing controls, making this section a high priority.

4 questions

high

Quality Control

The recall for particulate matter highlights potential deficiencies in QC testing and release procedures, warranting high scrutiny.

4 questions

high

Supplier Management

Given Sun Pharma's multiple warning letters (SOURCE_3), a thorough review of their supplier management is crucial to ensure they are not passing on quality issues.

3 questions

medium

Documentation and Records

While important, the primary risk signals are more directly related to manufacturing and QC failures. However, data integrity is often a concern with multiple warning letters.

3 questions

medium

Personnel

General GMP requirement, but not directly highlighted by the specific risk signals provided.

3 questions

medium

Facilities and Equipment

While the recall points to equipment issues, the broader facilities section is less directly implicated by the specific signals than manufacturing controls.

2 questions

AI output · Regulatory Impact Classifier

Marcus (Regulatory) classifies a supplier-change in 4 seconds

Called by: Marcus

endpoint: POST /api/ai/change-control/classify-impact

US filing: pas

EU filing: major_eu_variation

risk: high

confidence: 0.95

US CLASSIFICATION

pas

The change involves replacing an excipient supplier with one that has not previously supplied material for this product class, necessitating a Prior Approval Supplement (PAS) to ensure the new supplier's material is suitable and does not impact product quality or safety.

21 CFR 314.70(b)(2)(i)21 CFR 314.70(b)(2)(ii)

EU CLASSIFICATION

major_eu_variation

A change of an excipient supplier, particularly when the new supplier has not previously supplied material for this product class, is considered a major variation as it may impact the quality, safety, or efficacy of the medicinal product. This requires assessment by the regulatory authorities.

Commission Reg (EC) 1234/2008 Annex I, Section 7.1.1Commission Reg (EC) 1234/2008 Annex I, Section 7.1.2

IMPLEMENTATION BLOCKERS

- FDA supplement acceptance and approval
- EU variation approval

RECOMMENDED ACTIONS

- Prepare and submit a Prior Approval Supplement (PAS) to the FDA.
- Prepare and submit a Type IA or IB variation application to the EU, likely requiring a major variation classification.
- Conduct comparative analytical testing and stability studies to demonstrate equivalence.
- Update relevant sections of the marketing authorization application/dossier.

a09-marcus-reg-impact.png · AI output · Regulatory Impact Classifier

Appendix · Fix log (why earlier runs looked blank)

Wrong backend URL	Frontend axios fell back to <code>hawkeye-server-sigma.vercel.app</code> because <code>APP_API_BASE_URL</code> was unset on the Vercel frontend project. Every call 403'd. Fixed by setting <code>APP_API_BASE_URL</code> , <code>NEXT_PUBLIC_APP_API_BASE_URL</code> , <code>NEXT_PUBLIC_SERVER_URL</code> to the real backend + redeploying.
Personas stuck on role=user	7 of 11 Novex personas had roles not in any EQMS allow-list. <code>scripts/fix-novex-user-roles.mjs</code> normalises them.
Empty list pages	Original seeder skipped Risk / MRM / Doc / Training. <code>scripts/seed-novex-eqms-fill.mjs</code> populates 5 FMEA risks, 2 MRMs, 4 SOPs, 3 training records.
No AI buttons on UI	AI components lived in <code>components/ai/*</code> but no page rendered them. Added a "View + AI" drawer on every deviation row that inlines <code>DeviationFiveWhyScaffolder</code> , <code>CapaRcaDrafter</code> , and <code>PredictiveCapaBadge</code> — all calling live endpoints.
CAPA register 404	Walkthrough used <code>/capas</code> (doesn't exist). Now uses <code>/buyer/capas</code> . Walkthrough's <code>detectBrokenPage()</code> also marks any 404/Forbidden body as SKIP instead of PASS.
Screenshots of loading spinners	Old wait watched for page-title text (renders instantly). New wait polls for <code>.MuiCircularProgress-root</code> to disappear AND a seeded data token (e.g. <code>NVX-2026-B014</code> , <code>MRM-DEMO</code> , <code>Blending</code>) before shooting.
