## Test pack — backend integration suites

| Suite                                         | Scope                                                                           | Result    |
|-----------------------------------------------|---------------------------------------------------------------------------------|-----------|
| <code>test-supplier-quality-events.mjs</code> | Tier 1 — schema supplierId · aggregator · AI agent context · module bundles     | 20/20 ✓   |
| <code>test-tier2-supplier-bridge.mjs</code>   | Tier 2 — complaint→for-cause audit · CAPA closure→scorecard refresh             | 12/12 ✓   |
| <code>test-tier3-supplier-bridge.mjs</code>   | Tier 3 — BatchRecord + Equipment vendor linkage · per-observation V1 audit→CAPA | 16/16 ✓   |
| <code>test-audit-lifecycle-e2e.mjs</code>     | End-to-end 24-step flow with all 10 personas                                    | 53/53 ✓   |
| Total backend                                 | 4 suites                                                                        | 101/101 ✓ |

📹 **Per-persona videos** are saved alongside this report at `videos/.webm` (10 files). Each video shows the full browser session for one persona walking through their pages on the live deploy.
