

Hawkeye Audit Flow — Swim-Lane Diagram

Hawkeye Go-To-Market Pack · 2026-04-29

Hawkeye Audit Flow — Swim-Lane Diagram

Persona-lane process map for the canonical 26-step audit lifecycle (the 24-step expert flow + 2 reconciled additions for remote-audit reality). Shipped state as of 2026-04-29 — all P0/P1 gaps closed except G7 (remote-audit video cockpit, deferred).

§1 — How to read

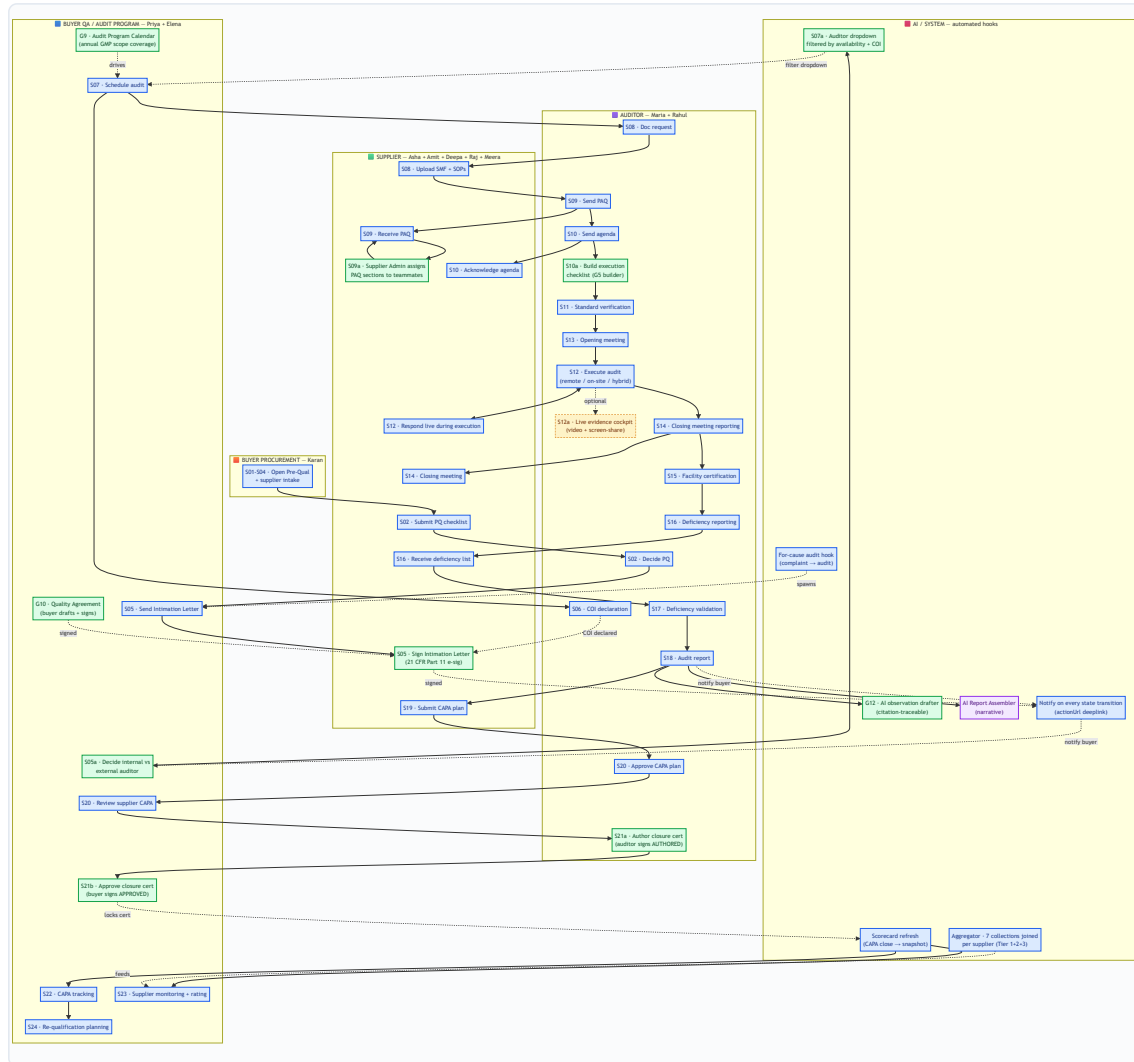

Five lanes, each owned by a persona group. Boxes flow top-to-bottom within a lane; **arrows that cross lanes are persona handoffs**. Color encoding tells you what just shipped vs. what was already there:

Color	Meaning
 green	Just shipped as part of the gap-closing roadmap (commit 589d8ac + 569c438)
 blue	Already wired before the gap sprint
 purple	AI / System automation — runs without a human click
 yellow	Deferred to a later phase (G7 — remote-audit cockpit)

Lanes:

Lane	Color	Owner	Personas	Their job
 BUYER PROCUREMENT	yellow	Karan	Karan Mehta	Initiates supplier engagements (PQ creation)
 BUYER QA / AUDIT PROGRAM	blue	Priya · Elena	Priya Nair (Audit PM) · Dr Elena Vasquez (VP QA)	Owns the audit programme, assigns auditors, approves CAPA, signs closure
 AUDITOR	purple	Maria · Rahul	Maria Santos (Lead) · Rahul Kapoor (Co)	3rd-party or internal — runs the audit + drafts report + generates CAPAs
 SUPPLIER	green	Asha + team	Asha Sharma (QA Head) · Amit · Deepa · Raj · Meera	Signs intimation, fills PAQ, assigns sections, submits CAPA
 AI / SYSTEM	red	(automated)	—	Closure-loop hooks, scorecard refresh, observation drafter

§2 — Swim-lane (full 26 steps)

§3 — The two key handoff patterns

1. Linear audit lifecycle (solid arrows):

Karan (S01) → Supplier (S02) → Auditor (S02 decision) → Buyer QA (S05 send intimation, S05a pick auditor type) → **Supplier (S05 sign)** → Auditor (S06 COI · S08-S11 prep) → **Auditor (S10a build execution checklist)** → Auditor (S12 execute, S13-S15) → Supplier (S19 CAPA) → Auditor (S20 approve · S21a sign closure) → **Buyer QA (S21b approve closure)** → System (scorecard refresh)

The bold steps are the four shipped-this-sprint additions that fill what was broken in the demo.

2. EQMS→Supplier bridge automation (dotted arrows from System lane):

- Every quality event (deviation, complaint) feeds the unified Quality Events pane
- For-cause audit hook spawns a new audit when a critical complaint is filed
- CAPA closure auto-refreshes the supplier scorecard
- Audit Program Calendar drives buyer QA scheduling
- Quality Agreement constrains intimation letter content (audit-rights clause must hold)

§4 — What's shipped vs. deferred

Layer	Shipped	Deferred
Backend	G1 intimation sign · G2 available-auditors filter · G3 auditor affiliation · G4 bulk PAQ assignment · G5 execution scope · G8 closure cert · G9 audit program · G10 quality agreement · G11 formality resolver · G12 observation drafter (skeleton)	G7 video cockpit
Frontend	G1 sign button · G2 selector prop · G4 bulk-assign page · G5 execution builder · G8 closure cert page	G7 cockpit · G9/G10 management UIs · G12 drafter UI
E2E tests	42/42 PASS covering G1, G2, G3, G5, G8, G9, G10, G12	G4 (needs supplier-team mock) · G7

§5 — Process flow as a numbered list (for accessibility)

#	Step	Lane	Who	Status
1	Open Pre-Qualification	Buyer Procurement	Karan	
2	Submit PQ checklist	Supplier	Asha	
3	Decide PQ (approve/conditional/reject)	Auditor	Maria	
4	Approved PQ → ready to audit	System	—	
5	Send Intimation Letter	Buyer QA	Priya	
6	Sign Intimation Letter (e-sig)	Supplier	Asha	G1
7	Decide internal vs external auditor	Buyer QA	Priya	G3/G5a
8	Auditor dropdown filtered by availability + COI	System	—	G2/S07a
9	Schedule audit	Buyer QA	Priya	
10	COI declaration	Auditor	Maria	
11	Pre-audit doc request	Auditor	Maria	
12	Upload SMF + SOPs	Supplier	Asha	
13	Send PAQ	Auditor	Maria	
14	Supplier admin bulk-assigns PAQ sections	Supplier	Asha	G4
15	Each teammate fills assigned section	Supplier	Amit · Deepa · Raj · Meera	
16	Send agenda	Auditor	Maria	
17	Acknowledge agenda	Supplier	Asha	
18	Build execution checklist (curate from template)	Auditor	Maria	G5
19	Standard verification	Auditor	Maria	
20	Opening meeting	Auditor + Buyer + Supplier	Maria + Priya + Asha	
21	Execute audit (remote/on-site/hybrid)	Auditor + Supplier	Maria + Asha	
22	Live evidence capture cockpit	Auditor + Supplier	(deferred)	G7
23	Closing meeting	Auditor + Supplier	Maria + Asha	
24	Facility certification	Auditor + Buyer QA	Maria + Priya	
25	Deficiency reporting	Auditor → Supplier	Maria → Asha	
26	Deficiency validation	Auditor + Supplier	Maria + Asha	
27	Audit report	Auditor	Maria	
28	AI observation drafter (citation-traceable)	System	—	G12
29	Per-finding CAPA generated	Auditor	Maria	
30	Submit CAPA plan	Supplier	Asha	
31	Auditor reviews CAPA	Auditor	Maria	
32	Buyer reviews CAPA	Buyer QA	Priya	
33	Auditor authors closure certificate (AUTHORED sig)	Auditor	Maria	G8a
34	Buyer approves closure certificate (APPROVED sig)	Buyer QA	Elena	G8b
35	Scorecard refresh + audit closed	System	—	
36	CAPA tracking	Buyer QA	Priya	
37	Supplier monitoring + rating	Buyer QA	Priya	

#	Step	Lane	Who	Status
38	Audit Program Calendar tracks scope coverage	Buyer QA	Elena	● G9
39	Re-qualification planning	Buyer QA	Priya	●
40	Quality Agreement enforces audit-rights clause	Buyer QA + Supplier	Elena + Asha	● G10

§6 — Where to find each step in code

Step	Backend	Frontend
Sign Intimation (G1)	<code>src/controllers/intimationSignatureController.js</code>	<code>app/(console)/supplier/audits/[id],</code>
Available auditors (G2)	<code>src/controllers/auditorAvailabilityController.js#listAvailableAuditors</code>	<code>components/shared/AuditorSelector.1</code> (<code>supplierIdForCoi</code> prop)
Auditor affiliation (G3)	<code>src/models/auditorProfileModel.js</code>	(passes through G2 selector)
Bulk PAQ assign (G4)	<code>src/controllers/questionnaireAssignmentController.js#bulkAssignSections</code>	<code>app/(console)/supplier/audits/[id],</code> <code>sections/page.tsx</code>
Execution scope (G5)	<code>src/controllers/executionScopeController.js</code>	<code>app/(console)/audits/[id]/execution</code> <code>builder/page.tsx</code>
Closure cert (G8)	<code>src/controllers/auditClosureController.js</code> + <code>src/models/auditClosureCertificateModel.js</code>	<code>app/(console)/audits/[id]/closure/</code>
Audit program (G9)	<code>src/routes/auditProgramRoutes.js</code> + <code>src/models/auditProgramModel.js</code>	(CRUD UI next session)
Quality agreement (G10)	<code>src/routes/qualityAgreementRoutes.js</code> + <code>src/models/qualityAgreementModel.js</code>	(workspace UI next session)
Q9(R1) formality (G11)	<code>src/services/audit/formalityResolver.js</code> + <code>formalityTier</code> fields	(chip in G5 builder)
AI observation drafter (G12)	<code>src/controllers/observationDrafterController.js</code>	(drafter pane next session)
