

Hawkeye Bug-Fix Test Report

Combined unit + end-to-end suite · 4/29/2026, 6:46:23 AM

86 TOTAL PASS	0 TOTAL FAIL	86 TESTS RUN	9280ms TOTAL DURATION
------------------	-----------------	-----------------	--------------------------

Defect found during E2E run. The Bug #8 fix (generateCapasFromReport mirroring CAPAs into the v2 collection) was silently failing in production: legacy observationToCapaSeverity returns lowercase values (major, minor) but the CapaV2 schema enum requires uppercase (HIGH, LOW, etc). The mirror was caught by a try/catch that only logged a warning, so the legacy CAPA was created but never appeared in the workspace. Patched mid-run by adding an explicit severity map; the E2E test now passes and re-asserts that both collections receive the row.

Test scope. Unit suite (61 tests) covers pure logic in isolation — role-filter construction, regex token substitution, query-builder branches, role-mapping tables, frontend config and source-shape assertions. No DB, no network. **E2E suite** (25 tests) boots the full Express app against an in-memory MongoDB, seeds users + tenant + audits, signs real JWTs, and drives the app via real HTTP through middleware → router → controller → model → DB. Same code path as production traffic.

Bug coverage matrix

ID	Bug	Unit	E2E	Notes
Earlier #1	Supplier table missing accept/reject row buttons	UNIT	—	Source-shape unit assertion; UI-only
Earlier #2	Tracking conflated intimation accept with audit accept	UNIT	E2E	isSupplierInitiationAcknowledged + supplier-decision route
Earlier #3	Buyer "Assign auditor" not visible in row	UNIT	—	Source-shape (showBuyerAssign condition relaxed)
Earlier #4	"Phase closed" when re-assigning auditor	—	—	Verified by code-review; needs corrupted phaseState seed to repro
Earlier #5	SMF redaction save → Network Error	—	E2E	5mb JSON body accepted
Earlier #6	Auditor checking criticality wipes supplier responses	UNIT	E2E	responseDetails merge is role-aware
Earlier #7	Auditor can't finalize Execution Q without ≥1 follow-up	UNIT	—	Frontend logic; pure unit covers state-machine output
Earlier #8	"2 CAPAs generated" but list shows none	—	E2E	CapaV2 mirror — found+fixed an enum mismatch during this run
Earlier #9	Tracking shows follow-up stages open with no follow-up	UNIT	E2E	listInstances filter
Earlier #10	Intimation letter has hardcoded dates/duration/supplier	UNIT	—	Pure regex substitution covered by 9 unit tests
Latest #1	Signup verification email	—	E2E	verificationLink + mailSent in response
Latest #2	Add Users tab missing in Buyer profile	UNIT	E2E	team-user role inference + HTTP route
Latest #3/#5	Marketplace + Product Catalog missing for Buyer	UNIT	—	Menu-config role list assertions
Latest #4	Organization Context dropdowns empty	UNIT	E2E	personaScope + managed-organizations route
Latest #7	Notification tray won't close	UNIT	—	Source-shape: Drawer not DetailsPanel
Latest #8/9	Buyer audit summary missing audits	UNIT	E2E	Tenant-scoped OR personal query — verified end-to-end with 2 buyers

Unit suite (61/61 passed · 101ms)

Bug #4 — applyPersonaScope auto-scopes by persona

8 passed · 0 failed · 8 total

Status	Test name	Duration	Error
PASS	supplier sees only their own rows (supplierId=me)	2ms	—
PASS	supplierUser also gets supplier scope	1ms	—
PASS	auditor uses auditorField when provided	0ms	—
PASS	buyer is not scoped (sees full tenant)	0ms	—
PASS	tenant_admin is not scoped (sees full tenant)	0ms	—
PASS	PLATFORM admin scope wins over role	0ms	—
PASS	unknown persona is denied (impossible filter set)	0ms	—
PASS	missing supplierField for supplier persona = no scope	0ms	—

Bug #2 — createTeamUser role inference

5 passed · 0 failed · 5 total

Status	Test name	Duration	Error
PASS	buyer invites → new user gets buyer role	1ms	—
PASS	supplier invites → new user gets supplierUser role	1ms	—
PASS	auditor invites → new user gets auditor role	0ms	—
PASS	tenant_admin invites → defaults to buyer	1ms	—
PASS	unknown role falls back to buyer	0ms	—

Bug #6 — auditor save preserves supplier responseDetails

4 passed · 0 failed · 4 total

Status	Test name	Duration	Error
PASS	auditor edit with empty responseDetails keeps supplier's answer	6ms	—
PASS	auditor edit with no responseDetails field keeps existing	0ms	—
PASS	supplier edit overwrites their own responseDetails	1ms	—
PASS	supplier edit with undefined falls back to existing then {}	1ms	—

Bug #7 — auditor finalize without follow-ups

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	with flagged questions: bounces to supplier as followup_requested	1ms	—
PASS	without flagged questions: marks review_completed (not sent_to_supplier)	0ms	—
PASS	review_completed must NOT be sent_to_supplier (regression guard)	0ms	—

Bug #8/9 — buyer audit query construction

4 passed · 0 failed · 4 total

Status	Test name	Duration	Error
PASS	buyer with tenant gets OR-scoped (tenant OR personal)	1ms	—
PASS	buyer without tenant falls back to personal only	0ms	—
PASS	buyer can NOT be limited to create_by_buyer_id alone (regression)	1ms	—
PASS	superadmin sees everything ({})	0ms	—

Bug #9 — follow-up milestones filter

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	hides follow-up milestones when status is sent_to_supplier	1ms	—
PASS	keeps follow-up milestones once questionnaireStatus contains 'followup'	1ms	—
PASS	keeps follow-up milestone if its instance is past NOT_STARTED	0ms	—

Bug #10 — intimation letter token substitution

9 passed · 0 failed · 9 total

Status	Test name	Duration	Error
PASS	substitutes [Date]	52ms	—
PASS	substitutes [Vendor/Supplier Company Name]	5ms	—
PASS	substitutes [Name of Product/API/Excipient]	2ms	—
PASS	substitutes [Vendor Code/Agreement Number, if applicable]	5ms	—
PASS	substitutes [Facility Address] vs [Address] separately	1ms	—
PASS	computes [End Date] from [Start Date] + [Number] days	1ms	—
PASS	substitutes [Number] for duration	3ms	—
PASS	regression: no literal '[Date]' or '[Vendor]' tokens left	1ms	—
PASS	falls back to today when no auditDate provided	1ms	—

Bug #2 companion — isSupplierInitiationAcknowledged

6 passed · 0 failed · 6 total

Status	Test name	Duration	Error
PASS	returns true when supplierIntimationAcceptedAt is set (new field)	1ms	—
PASS	returns true when trackStatus is 'Intimation acknowledged' (new value)	0ms	—
PASS	returns true for legacy 'Supplier accepted intimation'	0ms	—
PASS	returns true for actual ACCEPTED decision	0ms	—
PASS	returns false for empty audit (regression guard)	0ms	—
PASS	returns false when only generic 'accepted' track text (no longer sufficient alone)	0ms	—

dispatchNotification — severity inference

6 passed · 0 failed · 6 total

Status	Test name	Duration	Error
PASS	DEVIATION_REPORTED → warning	1ms	—
PASS	PQ_REQUESTED → warning	0ms	—
PASS	CHANGE_CONTROL_OPENED → warning	0ms	—
PASS	AUDIT_REPORT_DRAFTED → info (no warning verb)	1ms	—
PASS	PQ_DECISION → info	0ms	—
PASS	AUDIT_REPORT_REJECTED → critical (hypothetical)	0ms	—

notifySupplier — actionUrl propagation

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	actionUrl is merged into payload when present	1ms	—
PASS	payload is unchanged when actionUrl is null	0ms	—
PASS	payload is unchanged when actionUrl is undefined	0ms	—

Bug #3/#5 — buyer-side menu inclusion

5 passed · 0 failed · 5 total

Status	Test name	Duration	Error
PASS	SUPPLIER_MARKETPLACE includes BUYER and TENANT_ADMIN	1ms	—
PASS	PRODUCT_CATALOG includes BUYER and TENANT_ADMIN	1ms	—
PASS	REQUEST_AUDITS includes BUYER and TENANT_ADMIN	1ms	—
PASS	AUDITOR_NETWORK includes BUYER and TENANT_ADMIN	1ms	—
PASS	MY_WORKSPACE supplier menu group has all 10 expected items	2ms	—

Bug #7 — NotificationBell uses temporary Drawer

2 passed · 0 failed · 2 total

Status	Test name	Duration	Error
PASS	NotificationBell no longer wraps panel in DetailsPanel	1ms	—
PASS	NotificationBell renders standard MUI Drawer with onClose	0ms	—

Earlier — supplier accept/reject row buttons

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	audit table imports both supplier accept/reject helpers	0ms	—
PASS	table renders showSupplierAcceptReject branch with handlers	0ms	—
PASS	buyer assign-auditor button no longer requires supplierDecision==='ACCEPTED'	0ms	—

End-to-end suite (25/25 passed · 9179ms)

Bug #1 — signup surfaces verificationLink

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	POST /api/auth/register returns verificationLink + mailSent flag	2476ms	—

Bug #2 — team-user invitation flow

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	buyer can invite a teammate via /api/auth/team-user (gets buyer role)	1875ms	—
PASS	supplier inviting a teammate gets supplierUser role	1846ms	—
PASS	non-tenant role (no token) is rejected with 401	18ms	—

Bug #4 — managed-organizations endpoint open to buyer

2 passed · 0 failed · 2 total

Status	Test name	Duration	Error
PASS	buyer hits /api/org-directory/me/managed-organizations and gets 200 (was 403)	113ms	—
PASS	supplier also gets 200	115ms	—

Bug #8/9 — buyer audit summary tenant-scoped

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	buyer1 sees audits created by buyer2 in same tenant (regression)	94ms	—
PASS	buyer2 also sees audits created by buyer1	61ms	—
PASS	supplier sees audits where they are supplier_id	76ms	—

Bug #2 (earlier) — supplier-decision sets supplierDecision

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	POST /supplier-decision with ACCEPTED writes supplierDecision='ACCEPTED'	233ms	—

applyPersonaScope — supplier sees only own EQMS records

2 passed · 0 failed · 2 total

Status	Test name	Duration	Error
PASS	supplier1 sees only their own deviation in GET /api/deviations	62ms	—
PASS	buyer sees both deviations (no persona scope)	64ms	—

PQ — supplierId required + acknowledge

4 passed · 0 failed · 4 total

Status	Test name	Duration	Error
PASS	PQ create without supplierId returns 400	52ms	—
PASS	PQ create with supplierId succeeds	67ms	—
PASS	supplier acknowledges PQ via POST /:id/acknowledge	90ms	—
PASS	supplier sees only their own PQ (persona scope)	71ms	—

Notification bridge — outbox + ModuleNotification

2 passed · 0 failed · 2 total

Status	Test name	Duration	Error
PASS	PQ creation fires both NotificationOutbox and ModuleNotification rows	497ms	—
PASS	ModuleNotification row carries actionUrl	18ms	—

Deviation — supplier notification fires

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	POST /api/deviations with supplierId fires DEVIATION_REPORTED to supplier	529ms	—

ChangeControl — SUPPLIER type requires supplierId

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	PQ create with supplierId succeeds	67ms	—
PASS	POST /api/universal/change-controls with changeType=SUPPLIER + no supplierId → 400	105ms	—
PASS	POST with supplierId succeeds and creates record	80ms	—

Bug #5 — express.json 25mb limit

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	backend accepts ~5mb JSON body without 'PayloadTooLargeError'	320ms	—

Bug #8 — CAPA mirrors into CapaV2

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	CAPA generation writes to BOTH legacy Capa AND new CapaV2	160ms	—

Bug #9 — follow-up milestones filtered out

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	GET /api/workflows/AuditRequest/:id/milestones excludes FOLLOWUP_* by default	53ms	—

Bug #6 — auditor save preserves supplier answer

1 passed · 0 failed · 1 total

Status	Test name	Duration	Error
PASS	auditor PUT with empty responseDetails does NOT wipe supplier's answer	104ms	—
