DURATION

Scope. Pure unit tests covering every bug fix shipped between 2026-04-28 and 2026-04-29. Each test exercises the deterministic logic that ships in production (role-based filter construction, regex token substitution, query-builder branches, role-mapping tables, and frontend config entries). DB-bound integration paths (notification persistence, Mongoose model writes, route handlers) are out of scope here — those are covered by separate integration suites and live verification scripts.

Bug #4 — applyPersonaScope auto-scopes by persona

8 passed · 0 failed · 8 total

Status	Test name	Duration	Error
PASS	supplier sees only their own rows (supplierId=me)	2ms	—
PASS	supplierUser also gets supplier scope	1ms	—
PASS	auditor uses auditorField when provided	0ms	—
PASS	buyer is not scoped (sees full tenant)	0ms	—
PASS	tenant_admin is not scoped (sees full tenant)	0ms	—
PASS	PLATFORM admin scope wins over role	0ms	—
PASS	unknown persona is denied (impossible filter set)	0ms	—
PASS	missing supplierField for supplier persona = no scope	0ms	—

Bug #2 — createTeamUser role inference

5 passed · 0 failed · 5 total

Status	Test name	Duration	Error
PASS	buyer invites → new user gets buyer role	1ms	—
PASS	supplier invites → new user gets supplierUser role	1ms	—
PASS	auditor invites → new user gets auditor role	0ms	—
PASS	tenant_admin invites → defaults to buyer	1ms	—
PASS	unknown role falls back to buyer	0ms	—

Bug #6 — auditor save preserves supplier responseDetails

4 passed · 0 failed · 4 total

Status	Test name	Duration	Error
PASS	auditor edit with empty responseDetails keeps supplier's answer	6ms	—
PASS	auditor edit with no responseDetails field keeps existing	0ms	—
PASS	supplier edit overwrites their own responseDetails	1ms	—
PASS	supplier edit with undefined falls back to existing then {}	1ms	—

Bug #7 — auditor finalize without follow-ups

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	with flagged questions: bounces to supplier as followup_requested	1ms	—
PASS	without flagged questions: marks review_completed (not sent_to_supplier)	0ms	—
PASS	review_completed must NOT be sent_to_supplier (regression guard)	0ms	—

Bug #8/9 — buyer audit query construction

4 passed · 0 failed · 4 total

Status	Test name	Duration	Error
PASS	buyer with tenant gets OR-scoped (tenant OR personal)	1ms	—
PASS	buyer without tenant falls back to personal only	0ms	—
PASS	buyer can NOT be limited to create_by_buyer_id alone (regression)	1ms	—
PASS	superadmin sees everything ({})	0ms	—

Bug #9 — follow-up milestones hidden when no follow-up active

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	hides follow-up milestones when status is sent_to_supplier	1ms	—
PASS	keeps follow-up milestones once questionnaireStatus contains 'followup'	1ms	—
PASS	keeps follow-up milestone if its instance is past NOT_STARTED	0ms	—

Bug #10 — intimation letter token substitution

9 passed · 0 failed · 9 total

Status	Test name	Duration	Error
PASS	substitutes [Date]	52ms	—
PASS	substitutes [Vendor/Supplier Company Name]	5ms	—
PASS	substitutes [Name of Product/API/Excipient]	2ms	—
PASS	substitutes [Vendor Code/Agreement Number, if applicable]	5ms	—
PASS	substitutes [Facility Address] vs [Address] separately	1ms	—
PASS	computes [End Date] from [Start Date] + [Number] days	1ms	—
PASS	substitutes [Number] for duration	3ms	—
PASS	regression: no literal '[Date]' or '[Vendor]' tokens left	1ms	—
PASS	falls back to today when no auditDate provided	1ms	—

Bug #2 companion — isSupplierInitiationAcknowledged accepts new field

6 passed · 0 failed · 6 total

Status	Test name	Duration	Error
PASS	returns true when supplierIntimationAcceptedAt is set (new field)	1ms	—
PASS	returns true when trackStatus is 'Intimation acknowledged' (new value)	0ms	—
PASS	returns true for legacy 'Supplier accepted intimation'	0ms	—
PASS	returns true for actual ACCEPTED decision	0ms	—
PASS	returns false for empty audit (regression guard)	0ms	—
PASS	returns false when only generic 'accepted' track text (no longer sufficient alone)	0ms	—

dispatchNotification — severity inference for new event keys

6 passed · 0 failed · 6 total

Status	Test name	Duration	Error
PASS	DEVIATION_REPORTED → warning	1ms	—
PASS	PQ_REQUESTED → warning	0ms	—
PASS	CHANGE_CONTROL_OPENED → warning	0ms	—
PASS	AUDIT_REPORT_DRAFTED → info (no warning verb)	1ms	—
PASS	PQ_DECISION → info	0ms	—
PASS	AUDIT_REPORT_REJECTED → critical (hypothetical)	0ms	—

notifySupplier — actionUrl propagated into payload

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	actionUrl is merged into payload when present	1ms	—
PASS	payload is unchanged when actionUrl is null	0ms	—
PASS	payload is unchanged when actionUrl is undefined	0ms	—

Bug #3/#5 — buyer-side menu items include both BUYER and TENANT_ADMIN

5 passed · 0 failed · 5 total

Status	Test name	Duration	Error
PASS	SUPPLIER_MARKETPLACE includes BUYER and TENANT_ADMIN	1ms	—
PASS	PRODUCT_CATALOG includes BUYER and TENANT_ADMIN	1ms	—
PASS	REQUEST_AUDITS includes BUYER and TENANT_ADMIN	1ms	—
PASS	AUDITOR_NETWORK includes BUYER and TENANT_ADMIN	1ms	—
PASS	MY_WORKSPACE supplier menu group has all 10 expected items	2ms	—

Bug #7 — NotificationBell uses temporary Drawer for backdrop dismissal

2 passed · 0 failed · 2 total

Status	Test name	Duration	Error
PASS	NotificationBell no longer wraps panel in DetailsPanel	1ms	—
PASS	NotificationBell renders standard MUI Drawer with onClose	0ms	—

Bug #1/Bug #5 (earlier batch) — supplier accept/reject row buttons

3 passed · 0 failed · 3 total

Status	Test name	Duration	Error
PASS	audit table imports both supplier accept/reject helpers	0ms	—
PASS	table renders showSupplierAcceptReject branch with handlers	0ms	—
PASS	buyer assign-auditor button no longer requires supplierDecision==='ACCEPTED'	0ms	—
